

SILVER ARROW SNOW

SILVER ARROW SNOW

Snowmobilers know all aluminum means no rust! Silver Arrow snowmobile trailers are made with integrated aluminum main rails, cross-members, wall posts, roof bows and more for strength, durability and rust resistance.

This is arguably the strongest aluminum trailer on the market; designed and built based on Pace's 20 plus years of enclosed trailering experience.

Great standard features include an aerodynamic V-nose front end, rear ramp doors, a walk-thru side door, ski tie-down bars, D-rings and interior dome lights with wall switch to name a few. They're also built right with a thick 3/4" Wolmanized plywood floor, a smooth rivet-less exterior, trailer rated radial tires, and much more. Add one last feature: a nationwide 5 Year Limited Warranty.

With our industry leading reputation as their foundation, Silver Arrow aluminum trailers are the most aerodynamic, functional, and well-built trailers for hauling your valuable sleds. Designed to withstand the rigors of heavy use and road salt, your trailer will look great and perform well for years. Silver Arrow by Pace American: All aluminum construction done right!
